

Alpha Australian Blue Chip Equities - Snapshot

Morningstar Category: Australia OE Equity Australia Large Growth
 Inception Date: 2/04/2007

Fund and Market Commentary

The S&P/ASX300 Accumulation Index rose by 3.34% during April with the Alpha Australian Blue Chip Fund lagging the benchmark. Better performing sectors were Materials and Resources, while Utilities and Consumer Discretionary underperformed. Since inception, the Fund has achieved outperformance relative to the benchmark.

Equity markets were largely positive over April with rising oil and commodity prices providing a tailwind. That said, much of the appreciation of commodities such as iron ore and steel rebar has been attributed to massive Chinese speculation, leading to fears of a bubble.

In economic releases the Australian Bureau of Statistics (ABS) has reported the annual GDP growth rate expanded 0.3% last quarter to 3% while the unemployment rate remained steady at 5.8%. ABS figures showed retail turnover grew 0.2% month on month bringing the total annualised increase to 3.6%.

China's Caixin Purchasing Managers Index (PMI) softened by 0.3 points in April with a reading of 49.4 which indicates contraction. The Australian Dollar (AUD) ended the month largely flat at 0.76 United States (US) cents after retreating from a high of 0.7837. The Reserve Bank of Australia (RBA) continues to hold rates at 2%.

Considering the prospects for assets beyond short-term volatility, our preference is to take a longer term approach to the markets. This does not mean we are not actively managing the fund. To the contrary, the structure of our fund is always reflective of our current assessment of market risk. In structuring the fund, Alpha Fund Managers seek to select high-quality managers and blend these managers to create portfolios that can achieve consistent absolute and relative performances, irrespective of where we are in the market cycle.

Top Ten Holdings - April 2016

Stock Name	Sector

Asset Allocation

Investment Objective

The Alpha Blue Chip Fund aims to outperform the S&P/ASX 300 Accumulation Index (after fund fees and expenses, and before taxes) over rolling 3 to 5 year periods. The fund invests predominantly in a diversified portfolio of large market capitalisation Australian shares.

Alpha Fund Managers seek to achieve this objective by the blending of a small number of high conviction (not closet index) investment managers, each with a different investment process, in a complementary manner so as to produce consistent outperformance with similar or less risk than the benchmark.

Fund Style: Actively Managed Australian Equity Large Blend Portfolio

Current Manager Line-up

Greencape Capital is a boutique investment management firm that applies a high conviction management approach. Experienced and professional, the Greencape team is focused and committed to delivering superior, repeatable performance. Greencape believes its strong focus on qualitative stock attributes increases the opportunity for fund outperformance.

Manager Style: High Conviction Australian Equity Large Growth

Bennelong Australian Equity Partners is a Sydney based boutique fund manager. The manager believes that stock prices are driven by earnings and high quality companies deliver superior earnings/returns. The manager selects stocks based on its proprietary tools and focuses on quality companies which have higher than average profitability, earnings stability, financial strength as well as superior performance in capital management and ESG issues (i.e. Environment, Social and Corporate Governance). Technical factors such as market sentiment are also considered when initiating stock positions.

Manager Style: Concentrated Australian Equity Large Blend

State Street Global Advisors (SSGA) is a global leader in institutional asset management, managing more than \$2.4 trillion in assets. The firm, part of the wider State Street business, has 35 years of experience assisting clients navigate a range of market cycles and conditions. The firm employs over 2,200 people in 17 countries worldwide with nine investment centers across the Americas, Europe and Asia.

Manager Style: Quantitative Process, Targets Lower Volatility, Benchmark Agnostic

Smallco commenced operations in April 2000 and currently manages approximately \$700m of funds spread across the Smallco Investment Fund, the Smallco Broadcap Fund and a Broadcap mandate from a family office. The firm was founded by Rob Hopkins and Bill Ryan on the premise that inefficiencies exist within the pricing of smaller companies within the Australian listed securities market.

Manager style: Style Neutral Australian Equity Fund

About Alpha Fund Managers

Alpha Fund Managers' investment philosophy is based on the premise that there are particular investment managers that have the ability to consistently generate "alpha" over the medium to long-term and through all financial market cycles irrespective of any style bias (growth vs. value, large cap vs. small cap, etc.). "Alpha" in this context is defined as an investment manager's unique ability to select a portfolio of securities that differs from and outperforms its benchmark on a risk-adjusted basis. In other words, it is an investment manager's ability to beat the index. Alpha Fund Managers' investment process is based on a balanced approach to quantitative and qualitative research and analysis techniques to assess and select the underlying investment managers in each Alpha Fund Series fund. Alpha Fund Managers seek to add value by selecting investment managers demonstrating high-level of investment conviction, unique investment processes and proven record in managing risk and generating long-term "alpha" over full market cycle. Alpha Fund Managers then blend these managers to create portfolios that can achieve consistent absolute and relative performances, irrespective of where we are in the market cycle.
