

## Alpha Alternatives Fund - Snapshot

Morningstar Category: Alternative Strategies - Diversified  
 Inception Date: 01/02/2012

## Fund and Market Commentary

During November, the Bloomberg AusBond Cash benchmark returned 0.13%, while the Alpha Alternatives Fund underperformed the benchmark. Over longer periods, the Fund's performance remains competitive to the benchmark.

Macro/CTA index strategies finished the month of November nearly flat with the hedge fund composite index falling 0.15%. Global equity markets continued their upward trend in November, mainly backed by the United States (US) and Japanese equities. In the US, the third quarter Gross Domestic Product growth was revised up from 3% to 3.3%. Non-farm payroll increased by 228,000 in November following a gain of 261,000 last month. The unemployment rate remained the same at 4.1%. The tax reform proposals were passed by the congress faster than the market expected. Both confidence in the economy and the progress on bills helped to boost the performance of US equity markets. In local currency terms, the Dow Jones rose 3.83% and S&P 500 gained 2.81%.

The European equities faced some headwinds in November, due to political uncertainty, with Germany's DAX slipping 1.55%, Italy's MIB index down by 1.87% and the United Kingdom's (UK) FTSE 100 index sliding by 2.22%. In Germany, Chancellor Angela Merkel's efforts to form a coalition government failed as the Free Democratic Party unexpectedly pulled out of the negotiation, leaving Ms Merkel under the pressure of forming a minority government or new elections. The UK and European Union reached an agreement on a Brexit divorce bill, moving proceedings on to the second phase with more details to be finalised. When it comes to Asia, equity markets finished the month mixed with Japan's Nikkei 225 index climbing 3.24% and the Hong Kong Hang Seng Index jumping 3.30%, while China's Shanghai Composite fell 2.24%. The prices of oil rallied in November thanks to the agreement reached by Organisation of the Petroleum Exporting Countries (OPEC) and non-OPEC delegates including Russia to extend oil production cuts to the end of 2018, despite an option to review the deal in June.

Considering the prospects for assets beyond short-term noise and volatility, our preference is to take a longer term approach to the markets. This does not mean we are not actively managing the Fund. To the contrary, the structure of our Fund is always reflective of our most current assessment of market risk. In structuring the fund, Alpha Fund Managers seek to select high quality managers and blend these managers to create portfolios that can achieve consistent, absolute and relative performances, irrespective of where we are in the market cycle.

## Asset Allocation

## Strategy Allocation

## Investment Objective

The Alpha Alternatives Fund is designed for investors seeking strong long-term returns by investing in underlying strategies that provide exposure to a well-diversified portfolio of specialist absolute return investment managers. The Alpha Alternatives Fund will invest in equity long-short, relative value, event driven, global macro and managed futures. The Alpha Alternatives Fund will actively seek to take advantage of strategic country and asset allocation, as well as security pricing opportunities, by investing in a diverse range of securities across the globe. The composition and performance of the fund may differ significantly from its benchmark.

*Fund Style: Actively Managed and Broadly Diversified Global Hedge Fund*

## Current Manager Line-up

**H2O Force 10** is a global macro hedge fund strategy that aims to generate returns from long and short positions in various equity, fixed income, currency, and futures markets, primarily based on overall economic and political views of various countries and macroeconomic principles. The H2O strategy aims to provide not only risk-adjusted performance at portfolio level, but also transparency and daily liquidity.

*Manager Style: Actively Managed and Broadly Diversified Macro Hedge Fund*

**Legg Mason Western Asset Management**, a Legg Mason affiliate, is one of the world's leading fixed income managers and provides investment services for a wide variety of global clients, with broad capabilities across the fixed income spectrum. By devoting all of its resources to fixed income, Western Asset adds unique value to this asset class through active management of fixed income portfolios, with a value-oriented investment approach that is supported by a team of fixed income specialists in every market sector. Legg Mason Western Asset Macro Opportunities Bond is an unconstrained, global macro fixed income alternative that seeks to maximize total return while being less correlated to traditional fixed income and equity markets. The fund focuses on long-term value investing and active management of duration, yield curve and volatility by identifying relative value among securities and sectors in global fixed income markets.

*Manager Style: Active Unconstrained Global Macro Fixed Income Alternative Strategy*

**L1 Capital** is a boutique fund manager established in 2007 by Raphael Lamm (ex Cooper Investors) and Mark Landau (ex Invesco). L1 Capital has been one of Australia's top performing Australian equity fund managers since inception in August 2007. L1 uses a fundamental, bottom-up research process to identify securities with the potential to provide attractive risk-adjusted returns. The fund aims to achieve lower beta than long-only products and lower portfolio risk than the market.

*Manager Style: Active Unconstrained Long Short Equities Strategy*

**Dalton Street Capital** is a boutique absolute return investment manager that invests based on mathematically established principles of behavioural finance and rigorous logic. The approach provides investors with strong absolute returns and low correlation to traditional asset classes. The Dalton Street strategy was formulated in 1996 and has delivered positive absolute returns in every calendar year since inception. Dalton Street brings together experienced and talented investment professionals within a partnership model that ensures direct alignment with investor's interest.

*Manager Style: Active Unconstrained Asia Pacific Equities Strategy*

**AE Capital** is a systematic global macro fund manager that generates uncorrelated pure alpha. AE Capital achieves this by employing a unique dynamic strategy that adapts to changing macroeconomic themes and market conditions. AE Capital is different to traditional systematic and CTA managers in that they are purely fundamental, combining top-down fundamental market analysis with a scientific approach to produce systematic trading strategies.

*Manager Style: Active Unconstrained Global Macro FX Strategy*

## About Alpha Fund Managers

**Alpha Fund Managers'** investment philosophy is based on the premise that there are particular investment managers that have the ability to consistently generate "alpha" over the medium to long-term, and through all financial market cycles irrespective of any style bias (growth vs. value, large cap vs. small cap, etc.). "Alpha" in this context is defined as an investment manager's unique ability to select a portfolio of securities that differs from and outperforms its benchmark on a risk-adjusted basis. In other words, it is an investment manager's ability to beat the index. Alpha Fund Managers' investment process is based on a balanced approach to quantitative and qualitative research and analysis techniques to assess and select the underlying investment managers in each Alpha Fund Series fund. Alpha Fund Managers seek to add value by selecting investment managers who demonstrate a high-level of investment conviction, unique investment processes and a proven record in managing risk and generating long-term "alpha" over full market cycle. Alpha Fund Managers then blend these managers to create portfolios that can achieve consistent, absolute and relative performance, irrespective of where we are in the market cycle.
