

Alpha Global Opportunities - Snapshot

Morningstar Category: Australia Fund Equity World Large Blend
 Inception Date: 2/04/2007

Fund and Market Commentary

The global equity market as measured by the MSCI World Index fell by 2.64% over June while the Alpha Global Opportunities Fund outperformed by 0.37%. Over the longer term the Fund has achieved competitive performance relative to its benchmark.

The United States (US) equity markets made another month of positive returns with the Dow Jones and S&P 500 indices up 1.62% and 0.48% respectively. The US unemployment rate rose slightly to 4.4% and non-farm payrolls increased by a healthy margin of 222,000 jobs. In consideration of the strengthening labour market, economic data and moderately rising economic activity, the Federal Reserve raised the target rates by 25 basis points to 1%-1.25% in June. However, given the issues of reforming healthcare policies and the uncertainty of President Trump's administration putting through fiscal stimulus, the central banks' forecasts and projections are complex and it is unclear how growth, inflation and interest rates will play out over time.

European markets were under pressure in June in light of political risks in the United Kingdom (UK) and the uncertainty over the European central bank's monetary policy. The UK's FTSE 100 index dropped by 2.76%, Germany's DAX fell 2.49% and Italy's MIB index ended the month 0.71% lower. The UK snap election on June 8th dominated headlines, but the result was disappointing as the Conservatives lost the majority in Parliament causing more concerns about the progress of Brexit given the tight timetable. In contrast, Asian markets enjoyed the tailwind with China's Shanghai Composite up by 2.41%, Japan's Nikkei 225 index rising 1.95% and the Hong Kong Hang Seng Index lifting 0.41%.

Considering the prospects for assets beyond short-term noise and volatility, our preference is to take a longer term approach to the markets. This does not mean we are not actively managing the Fund. To the contrary, the structure of our Fund is always reflective of our most current assessment of market risk. In structuring the fund, Alpha Fund Managers seek to select high quality managers and blend these managers to create portfolios that can achieve consistent, absolute and relative performances, irrespective of where we are in the market cycle.

Asset Allocation

Investment Objective

The Alpha Global Opportunities Fund seeks to outperform the MSCI World ex Australia index consistently. The Fund will invest in a diverse range of globally listed securities as well as taking advantage of active country and asset allocation.

Alpha Fund Managers seek to achieve the stated investment objective by the blending of a small number of high conviction investment managers, each with a different investment process, in a complementary manner so as to produce consistent outperformance with risk similar or less than the fund's benchmark.

Fund Style: Actively Managed Diversified Global Equity Portfolio

Current Manager Line-up

Magellan aims to find outstanding companies at attractive prices that have a strong competitive advantage and the ability to re-invest capital into the business at high incremental returns. This strategy is integrated with an in-depth macroeconomic understanding in order to manage risk. The Fund's portfolio comprises of 20 to 40 investments offering diversification to ensure the Fund is not overly correlated to a single company, industry or macroeconomic risk.

Manager Style: Global High Conviction Value

Polaris Capital Management has one of the longest track records of any firm in operation with over 25 years investing in global equity markets. The manager employs a deep value strategy using fundamental bottom-up stock selection with the flexibility to invest in companies across developed and emerging markets. Typical investments generate strong sustainable free cash flows while having conservative balance sheets.

Manager Style: Global Deep Value

Alliance Bernstein has grown significantly since its genesis in 1967 with offices in 22 countries, 3,490 employees and managing \$485 billion in assets. AB has a comprehensive range of research, portfolio-management, wealth-management and client-service offices around the world, reflecting its global capabilities and the needs of its clients. AB's global teams collaborate across asset classes and investment strategies in order to spark new thinking and deliver superior outcomes for clients.

Manager Style: Global Diversified Equity with a Focus on Real Earnings and Risk Management

Wellington Management offers comprehensive investment management capabilities that span nearly all segments of the global capital markets. Their investment solutions, tailored to the unique return and risk objectives of institutional clients in more than 50 countries, draw on a robust body of proprietary research and a collaborative culture that encourages independent thought and healthy debate. Since its humble beginnings in 1928, the business has grown to include 12 offices worldwide, catering for over 2100 clients and manages \$936 billion in assets.

Manager Style: Global High Conviction with Stable Earnings Focus

About Alpha Fund Managers

Alpha Fund Managers' investment philosophy is based on the premise that there are particular investment managers that have the ability to consistently generate "alpha" over the medium to long-term, and through all financial market cycles irrespective of any style bias (growth vs. value, large cap vs. small cap, etc.). "Alpha" in this context is defined as an investment manager's unique ability to select a portfolio of securities that differs from and outperforms its benchmark on a risk-adjusted basis. In other words, it is an investment manager's ability to beat the index. Alpha Fund Managers' investment process is based on a balanced approach to quantitative and qualitative research and analysis techniques to assess and select the underlying investment managers in each Alpha Fund Series fund. Alpha Fund Managers seek to add value by selecting investment managers who demonstrate a high-level of investment conviction, unique investment processes and a proven record in managing risk and generating long-term "alpha" over full market cycles. Alpha Fund Managers then blend these managers to create portfolios that can achieve consistent, absolute and relative performances, irrespective of where we are in the market cycle.
