Fund and Market Commentary

During April, the Bloomberg AusBond Cash benchmark returned 0.15%, while the Alpha Alternatives Fund lagged. Given limited performance history no comment can be made about the Funds long-term performance.

Macro/CTA Index strategies performed poorly over April with the hedge fund composite index 0.07% lower. United States (US) equity markets performed positively over April, with the Dow Jones and S&P 500 indices up by 1.34% and 0.91% respectively. European equity markets were largely positive with Germany's DAX rising 0.86% and Italy's MIB index increasing 0.57%, while the FTSE 100 fell 1.62%. Asian markets were mixed with Japan's Nikkei 225 index gaining 1.52% and the Hang Seng Index jumping 2.09%, while China's Shanghai Composite fell 2.11%.

Longer-dated global government bond yields declined in April although shorter-term yields rose given expectations for a rising interest rate environment in the near term. The United Kingdom (UK) Prime Minister, Theresa May, called for an early general election on 8th of June to strengthen her hand in Brexit engagement and to ensure that negotiations with the European Union flow smoothly and efficiently, which led to the pound rallying against the euro. The results of the first round of the French Presidential election concluded with Emmanuel Macron and Marine Le Pen winning. The diminished political volatility and improved market participants' confidence sparking a stock market rally across Europe, reflected the public perception that the independent centrist pro-European Union candidate, Marcon, would be the next French president. Global equity markets were broadly positive with an exception of the UK equity market. Crude oil prices closed the month lower due to concerns of a supply glut caused by continuously rising levels of oil production in the US and the restart of two key Libyan oilfields.

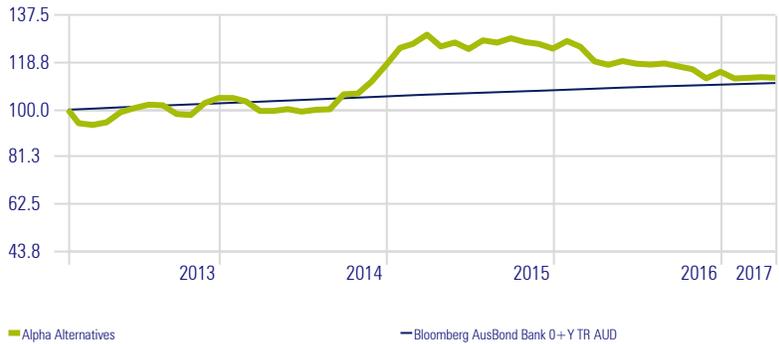

Considering the prospects for assets beyond short-term noise and volatility, our preference is to take a longer term approach to the markets. This does not mean we are not actively managing the Fund. To the contrary, the structure of our Fund is always reflective of our most current assessment of market risk. In structuring the fund, Alpha Fund Managers seek to select high quality managers and blend these managers to create portfolios that can achieve consistent, absolute and relative performances, irrespective of where we are in the market cycle.

Asset Allocation

Strategy Allocation

Investment Objective

The Alpha Alternatives Fund is designed for investors seeking strong long-term returns by investing in underlying strategies that provide exposure to a well-diversified portfolio of specialist absolute return investment managers. The Alpha Alternatives Fund will invest in equity long-short, relative value, event driven, global macro and managed futures. The Alpha Alternatives Fund will actively seek to take advantage of strategic country and asset allocation, as well as security pricing opportunities, by investing in a diverse range of securities across the globe. The composition and performance of the fund may differ significantly from its benchmark.

Fund Style: Actively Managed and Broadly Diversified Global Hedge Fund

Current Manager Line-up

H2O Force 10 is a global macro hedge fund strategy that aims to generate returns from long and short positions in various equity, fixed income, currency, and futures markets, primarily based on overall economic and political views of various countries and macroeconomic principles. The H2O strategy aims to provide not only risk-adjusted performance at portfolio level, but also transparency and daily liquidity.

Manager Style: Actively Managed and Broadly Diversified Macro Hedge Fund

The AQR Wholesale Managed Futures Fund is a trend-following strategy which uses proprietary quantitative models. The Fund provides long and short exposure to over 100 global developed and emerging markets in equities, bonds, commodities, and currencies (using futures, swaps, forwards and options). The strategy seeks to deliver systematic and risk controlled returns in a liquid form with low correlation to the returns of traditional asset classes. An efficient diversification of exposures is an explicit goal of this product.

Manager Style: Actively Managed and Broadly Diversified Macro Hedge Fund

The Henderson Absolute Return Australian Equity Fund is an actively managed portfolio of long and short positions in listed (or soon to be listed) companies (predominantly Australian companies) that seeks to provide investors with consistent, positive returns above the Benchmark through all cycles of the Australian equity market with little or no correlation to that market. The Fund aims to provide investors with a highly liquid investment opportunity, capital preservation and the delivery of long term equity market returns without the market volatility of a long only equity investment. The fund focuses on positive absolute returns in both rising and falling markets.

Manager Style: Actively Managed, Market Neutral Australian Equity Strategy

Legg Mason Western Asset Management, a Legg Mason affiliate, is one of the world's leading fixed income managers and provides investment services for a wide variety of global clients, with broad capabilities across the fixed income spectrum. By devoting all of its resources to fixed income, Western Asset adds unique value to this asset class through active management of fixed income portfolios, with a value-oriented investment approach that is supported by a team of fixed income specialists in every market sector. Legg Mason Western Asset Macro Opportunities Bond is an unconstrained, global macro fixed income alternative that seeks to maximize total return while being less correlated to traditional fixed income and equity markets. The fund focuses on long-term value investing and active management of duration, yield curve and volatility by identifying relative value among securities and sectors in global fixed income markets.

Manager Style: Active Unconstrained Global Macro Fixed Income Alternative Strategy

About Alpha Fund Managers

Alpha Fund Managers' investment philosophy is based on the premise that there are particular investment managers that have the ability to consistently generate "alpha" over the medium to long-term, and through all financial market cycles irrespective of any style bias (growth vs. value, large cap vs. small cap, etc.). "Alpha" in this context is defined as an investment manager's unique ability to select a portfolio of securities that differs from and outperforms its benchmark on a risk-adjusted basis. In other words, it is an investment manager's ability to beat the index. Alpha Fund Managers' investment process is based on a balanced approach to quantitative and qualitative research and analysis techniques to assess and select the underlying investment managers in each Alpha Fund Series fund. Alpha Fund Managers seek to add value by selecting investment managers who demonstrate a high-level of investment conviction, unique investment processes and a proven record in managing risk and generating long-term "alpha" over full market cycle. Alpha Fund Managers then blend these managers to create portfolios that can achieve consistent, absolute and relative performance, irrespective of where we are in the market cycle.
