

Alpha Alternatives Fund - Snapshot

Morningstar Category: Alternative Strategies - Diversified
 Inception Date: 6/02/2013

Fund and Market Commentary

During September the Bloomberg AusBond Cash benchmark returned 0.14%, while the Alpha Alternatives Fund lagged. Given limited performance history no comment can be made about the Funds long-term performance.

Macro/CTA Index strategies had another poor month of returns with the hedge fund composite index returning negative 0.15%. Global equities fared no better with most indices seeing red. The main exception to this was the United Kingdom which benefited from a large repricing of the British Pound, boosting overseas earnings and supporting higher equity valuations. European markets were mixed, with the FTSE 100 up 1.74%, while Germany's DAX was down 0.77% and Italy's MIB index fell 3.20%. Asian markets were under pressure with Japan's Nikkei 225 index falling 1.99% while China's Shanghai Composite was 2.62% in the red.

Looking at Central bank activity, the Bank of Japan announced it will modify its quantitative easing program while the European Central Bank held fire on policy action. Members of the Federal Open Market Committee (FOMC) met in September and voted in favour of keeping rates steady. The meeting minutes highlighted that while 'job gains have been solid' and 'household spending has been growing strongly', 'inflation is expected to remain low in the near term'. While the case for higher rates is building, the lack of inflation in the near-term will make it difficult for the Federal Reserve (FED) to move rates materially higher.

Considering the prospects for assets beyond short-term noise and volatility, our preference is to take a longer term approach to the markets. This does not mean we are not actively managing the Fund. To the contrary, the structure of our Fund is always reflective of our most current assessment of market risk. In structuring the fund, Alpha Fund Managers seek to select high quality managers and blend these managers to create portfolios that can achieve consistent, absolute and relative performances, irrespective of where we are in the market cycle.

Asset Allocation

Strategy Allocation

Investment Objective

The Alpha Alternatives Fund is designed for investors seeking strong long-term returns by investing in underlying strategies that provide exposure to a well-diversified portfolio of specialist absolute return investment managers. The Alpha Alternatives Fund will invest in equity long-short, relative value, event driven, global macro and managed futures. The Alpha Alternatives Fund will actively seek to take advantage of strategic country and asset allocation, as well as security pricing opportunities, by investing in a diverse range of securities across the globe. The composition and performance of the fund may differ significantly from its benchmark.

Fund Style: Actively Managed and Broadly Diversified Global Hedge Fund

Current Manager Line-up

H2O Force 10 is a global macro hedge fund strategy that aims to generate returns from long and short positions in various equity, fixed income, currency, and futures markets, primarily based on overall economic and political views of various countries and macroeconomic principles. The H2O strategy aims to provide not only risk-adjusted performance at portfolio level, but also transparency and daily liquidity.

Manager Style: Actively Managed and Broadly Diversified Macro Hedge Fund

The AQR Wholesale Managed Futures Fund is a trend-following strategy which uses proprietary quantitative models. The Fund provides long and short exposure to over 100 global developed and emerging markets in equities, bonds, commodities, and currencies (using futures, swaps, forwards and options). The strategy seeks to deliver systematic and risk controlled returns in a liquid form with low correlation to the returns of traditional asset classes. An efficient diversification of exposures is an explicit goal of this product.

Manager Style: Actively Managed and Broadly Diversified Macro Hedge Fund

About Alpha Fund Managers

Alpha Fund Managers' investment philosophy is based on the premise that there are particular investment managers that have the ability to consistently generate "alpha" over the medium to long-term, and through all financial market cycles irrespective of any style bias (growth vs. value, large cap vs. small cap, etc.). "Alpha" in this context is defined as an investment manager's unique ability to select a portfolio of securities that differs from and outperforms its benchmark on a risk-adjusted basis. In other words, it is an investment manager's ability to beat the index. Alpha Fund Managers' investment process is based on a balanced approach to quantitative and qualitative research and analysis techniques to assess and select the underlying investment managers in each Alpha Fund Series fund. Alpha Fund Managers seek to add value by selecting investment managers who demonstrate a high-level of investment conviction, unique investment processes and a proven record in managing risk and generating long-term "alpha" over full market cycle. Alpha Fund Managers then blend these managers to create portfolios that can achieve consistent, absolute and relative performance, irrespective of where we are in the market cycle.
