

Alpha Enhanced Yield - Snapshot

Morningstar Category: Australia Fund Multi-Strategy Income
 Inception Date: 2/04/2007

Fund and Market Commentary

During October, the Bloomberg AusBond Cash benchmark returned 0.15% while the Alpha Enhanced Yield Fund underperformed. Over longer periods the Fund's return has significantly outperformed the benchmark.

The movements of global sovereign bond yields were mixed with United States (US) sovereign yields going up and most of other developed markets falling in October. In the October/November US Federal Reserve (Fed) meeting, the Federal Open Market Committee (FOMC) decided to keep rates on hold and started normalising its \$4.4 trillion balance sheet with reducing \$6 billion Treasury securities during each calendar month. The European Central Bank (ECB) has announced its extension of the Asset Purchasing Programme (APP) for another nine months, but will reduce the monthly purchasing pace from EUR60 billion to EUR30 billion from January 2018, leaving the size and duration of APP open to a further expansion if financial conditions were to require it. The ECB's dovish tone put downward pressure on interest rates. US Treasury Notes ended the month higher with two year yields up twelve basis points to 1.600%, while ten year Notes grew five basis point to 2.379%. Australian two year Government bond yields fell thirteen basis points to 1.821%, while the ten year bond dipped thirteen basis points to 2.669%. In the Eurozone, German ten year yields declined by ten basis points to 0.363%, while Italian yields plunged twenty eight points to 1.827%.

Considering the prospects for assets beyond short-term volatility, our preference is to take a longer term approach to the markets. This does not mean we are not actively managing the Fund. To the contrary, the structure of our Fund is always reflective of our current assessment of market risk. In structuring the Alpha Enhanced Yield Fund, Alpha Fund Managers seek to select managers demonstrating a proven track record in managing risk and generating long-term outperformance. These managers are then blended to create portfolios that can achieve consistent, absolute and relative performances, irrespective of where we are in the market cycle.

Investment Objective

The Alpha Enhanced Yield Fund may invest in a portfolio of global government, semi-government, corporate, mortgage, asset-backed, high-yield and emerging-market sovereign debt, and other fixed interest securities, while seeking to preserve capital through diversification and prudent investment management.

Alpha Fund Managers seek to achieve this objective in each of the Alpha funds by blending a small number of high conviction investment managers, each with a different investment process, in a complementary manner so as to produce consistent outperformance with similar or less risk than the benchmark.

Fund Style: Actively Managed Diversified Multi-Strategy Fixed Income Portfolio

Current Manager Line-up

Manager Style: Actively Managed, Broadly Diversified, Leading Risk Management, Unconstrained Approach

About Alpha Fund Managers

Alpha Fund Managers' investment philosophy is based on the premise that there are particular investment managers that have the ability to consistently generate "alpha" over the medium to long-term, and through all financial market cycles irrespective of any style bias (growth vs. value, large cap vs. small cap, etc.). "Alpha" in this context is defined as an investment manager's unique ability to select a portfolio of securities that differs from and outperforms its benchmark on a risk-adjusted basis. In other words, it is an investment manager's ability to beat the index. Alpha Fund Managers' investment process is based on a balanced approach to quantitative and qualitative research and analysis techniques to assess and select the underlying investment managers in each Alpha Fund Series fund. Alpha Fund Managers seek to add value by selecting investment managers who demonstrate a high-level of investment conviction, unique investment processes and a proven record in managing risk and generating long-term "alpha" over full market cycles. Alpha Fund Managers then blend these managers so as to create portfolios that can achieve consistent, absolute and relative performances, irrespective of where we are in the market cycle.
