

## Alpha Infrastructure Fund - Snapshot

Morningstar Category: Infrastructure - Global  
 Inception Date: 1/02/2012

## Fund and Market Commentary

The S&P Global Infrastructure benchmark rose 1.77% in August with the Alpha Infrastructure fund underperforming the benchmark. The Fund has so far gathered limited return history and therefore no comment can be made about its long-term performance.

Global equity markets were generally mixed over August. United States (US) equities finished the month positively, with the Dow Jones and S&P 500 rising by 0.26% and 0.05% respectively in August, in spite of the ups and downs during the month due to the outlook of US interest rates, political uncertainty and the heightened risks of a military conflict between the US and North Korea. Hurricane Harvey made landfall in Texas and hit the center of US oil and gas industry with the second landfall strengthening into Category 4 intensity. This caused much destruction in Texas and forced the closure of oil refineries in the area.

The Eurozone economy continues to perform well and expanded at 0.6% in the June quarter, bringing the year on year expansion rate to 2.3% following a 2% growth in the March quarter. The August inflation rate is expected to reach 1.5% from 1.3% in July. The labour markets saw an ongoing improvement in the eurozone with the unemployment rate staying at 9.1% in July, falling from 10% one year earlier. The European Central Bank (ECB) decided to hold interest rate steady in the latest policy meeting and postponed announcing the tapering decision until October, in consideration of the appreciating euro. In the European equity markets, the UK's FTSE 100 index lifted 0.80% and Italy's MIB index rose 0.85%, while Germany's DAX fell 0.52%. In Asia, China's Shanghai Composite continued to rise lifting 2.68%, the Hong Kong Hang Seng Index rose by 2.37%, while Japan's Nikkei 225 index lost 1.40%.

Considering the prospects for assets beyond short-term volatility, our preference is to take a longer term approach to the markets. This does not mean we are not actively managing the Fund. To the contrary, the structure of our Fund is always reflective of our current assessment of market risk. In structuring the Fund, Alpha Fund Managers seek to select high quality managers and blend these managers to create portfolios that can achieve consistent, absolute and relative performances, irrespective of where we are in the market cycle.

## Asset Allocation

## Investment Objective

The Alpha Infrastructure Fund is designed for investors seeking a diversified portfolio of specialist global listed Infrastructure investment managers. It aims to outperform (before fund fees and expenses, and before taxes) the S&P Global Infrastructure Total Return AUD Index on a rolling 3 to 5 year basis.

The Alpha Infrastructure Fund invests in infrastructure assets through securities listed on global stock exchanges. The fund aims to be fully invested at all times with cash exposure not exceeding 20 per cent for any length of time. The underlying funds in which the Alpha Infrastructure Fund invests may utilise approved derivative instruments subject to the specific restriction that derivative instruments cannot be used to gear the portfolio exposure.

*Fund Style: Actively Managed Australian Equity Large Blend Portfolio*

## Current Manager Line-up

**Magellan Asset Management Limited** is a wholly owned subsidiary of the Australian Securities Exchange-listed Magellan Financial Group Limited. Magellan establishes and operates globally focused investment funds for retail, high net worth and institutional investors.

The Magellan Infrastructure Strategy invests in global listed infrastructure securities. Magellan believes that quality infrastructure assets have two key characteristics: the asset provides a service that is essential for the efficient functioning of a community, and the cash-flows generated by the asset are reliable and do not face external risks (such as sovereign risk, competition, commodity price movements or technological obsolescence). The Magellan Infrastructure strategy aims to provide consistent long-term absolute returns, which exceed the risk adjusted returns expected of the asset class.

*Manager Style: High Conviction Global Infrastructure*

**Maple-Brown Abbott** is one of Australia's first boutique investment managers and have managed institutional investment portfolios for over 30 years. The firm specializes in the management of investment portfolios across Australian equities, Asia Pacific ex-Japan equities and global listed infrastructure securities. Current FUM across all strategies is AUD \$11 billion. The Infrastructure fund is an actively managed portfolio of global listed infrastructure securities with a focus on regulated, contracted and concession assets or networks that provide essential services. The investment team are highly experienced and aligned to investors holding a large equity stake in the fund.

*Manager Style: High Conviction Global Infrastructure*

## About Alpha Fund Managers

**Alpha Fund Managers'** investment philosophy is based on the premise that there are particular investment managers that have the ability to consistently generate "alpha" over the medium to long-term, and through all financial market cycles irrespective of any style bias (growth vs. value, large cap vs. small cap, etc.). "Alpha" in this context is defined as an investment manager's unique ability to select a portfolio of securities that differs from and outperforms its benchmark on a risk-adjusted basis. In other words, it is an investment manager's ability to beat the index. Alpha Fund Managers' investment process is based on a balanced approach to quantitative and qualitative research and analysis techniques to assess and select the underlying investment managers in each Alpha Fund Series fund. Alpha Fund Managers seek to add value by selecting investment managers who demonstrate a high-level of investment conviction, unique investment processes and a proven record in managing risk and generating long-term "alpha" over full market cycle. Alpha Fund Managers then blend these managers to create portfolios that can achieve consistent, absolute and relative performances, irrespective of where we are in the market cycle.
